PROJECTS

Expense Split Tracker	GitHub	2025
Tech Stack : Java SpringBoot MySQL		
Built a full-stack expense-splitting system that logs shared costs, tracks who paid, calculates individual balances, and generates real-time “who owes whom” summaries using Spring Boot and database connectivity.		
Education Dropout Prediction system	GitHub	2025
Tech Stack : AIML Python Streamlit		
Built a predictive analytics system that identifies at-risk students by analyzing academic and behavioral features. Trained and evaluated ML models to forecast dropout probability. Implemented an interactive Streamlit dashboard for educators to visualize risk scores and support early interventions.		
Financial Investment Portfolio Management	GitHub	2025
Tech Stack : Java HTML JavaScript MySQL		
Created a platform to track and manage stocks, bonds, and other investments. Connected the system to a MySQL database for persistent storage of portfolio details. Added performance calculations and interactive UI for better financial decision-making.
